

Youth Photographer of the year 2025

Final Result

1st Award : Thiruchitrambalam M

These three nightscapes were captured in some of the darkest skies across India, including Hanle and other locations. My aim was to show the vastness of the night sky as it stretches across the horizon and how it connects with the land beneath. Through these images, I want viewers to feel the same wonder I experienced under the stars and to understand why it is important to protect dark skies from light pollution
